

TASMANIAN PURE
CONTINENTAL SMALLGOODS

As a producer of high quality, award-winning products, Thomas uses modern technology, local produce and European family recipes to create a totally unique range of Tasmanian products based on his European heritage.

Thomas is a third generation continental smallgoods manufacturer. He uses only the choicest quality meats, the most evocative spices and truly believes that "to keep the full flavour of nature you should not alter nature's product itself". This is why, at Tasmanian Pure, no cheap ingredients are allowed to be included; such as cereals or pre-mixes, fillers or unnecessary additives, no added gluten, giving the products the high meat content. In fact, it is that minimum quantity of lean meat in these products, which is paramount in determining the quality.

In Thomas' smallgoods production, the meat is boned out, graded, then minced (either coarse or fine) and combined with the other ingredients as per recipe. It is then filled into the appropriate casing, this can be natural skins, collagen casing or any other casing depending on the product.

Whilst the majority of the products are produced from local pork, there are also beef, game and poultry products available. At Tasmanian Pure the range extends to different categories:

- Large COOKED SAUSAGES/cold cuts for slicing -
 - SMOKED SAUSAGES to be eaten cold, hot, grilled or BBQed;
 - SMOKED and DRIED SAUSAGES - GOURMET SAUSAGES
 - HAMS and SMOKED MEATS for slicing
 - PATES and TERRINES - BAKED MEATS
 - the tantalizing TASMANIAN PURE GAME OR POULTRY range
- Tasmanian Pure is committed to customer satisfaction and the provision of products of an outstanding quality.

TASMANIAN PURE

GAME

The Tasmanian Pure Game range has been created to extend the already large variety of quality smallgoods. With today's conscious eating habits, people are looking more and more for low fat products. Wallaby in particular is a fantastic natural resource in Tasmania and with less than 5% fat within the meat protein provides an ideal base for low fat produce.

The venison is from farmed animals and provides an additional low fat option. Both Wallaby and Venison have become highly popular amongst the general public and the hospitality industry.
